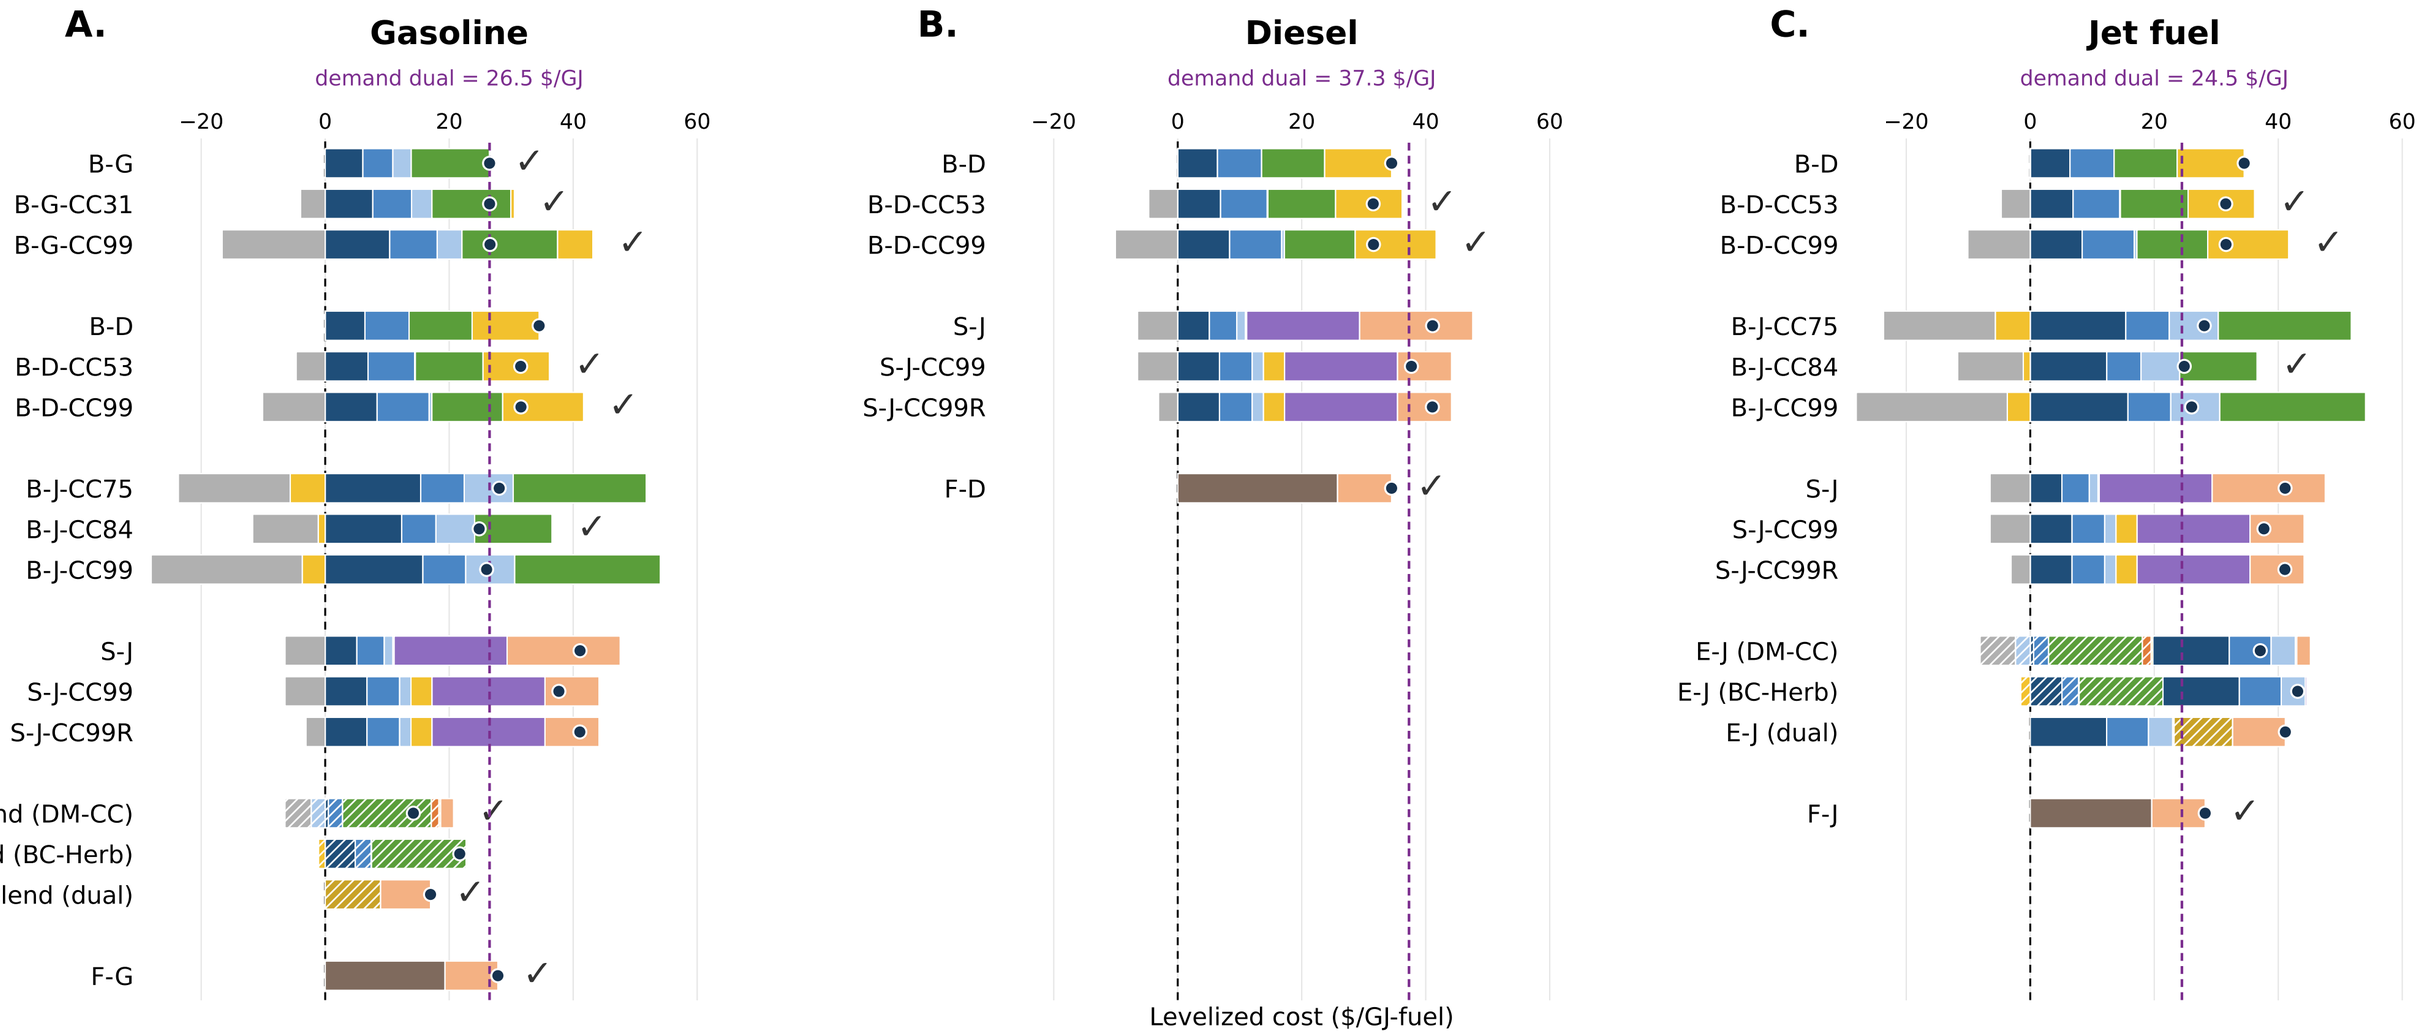
Levelized cost of liquid fuels — HB_HS: 1c_HB_HS_CCfermflue_blend_jet



Ethanol feedstock: (DM-CC) existing dry mill + CC on fermentation & flue gas, reconstructed | (BC-Herb) biochemical Bio_Ethanol_Herb (most-produced), no CC, reconstructed | (dual) ethanol shadow price. Hatched = ethanol production.
✓ on DM-CC/BC bars needs the route AND that ethanol pathway to be deployed.
