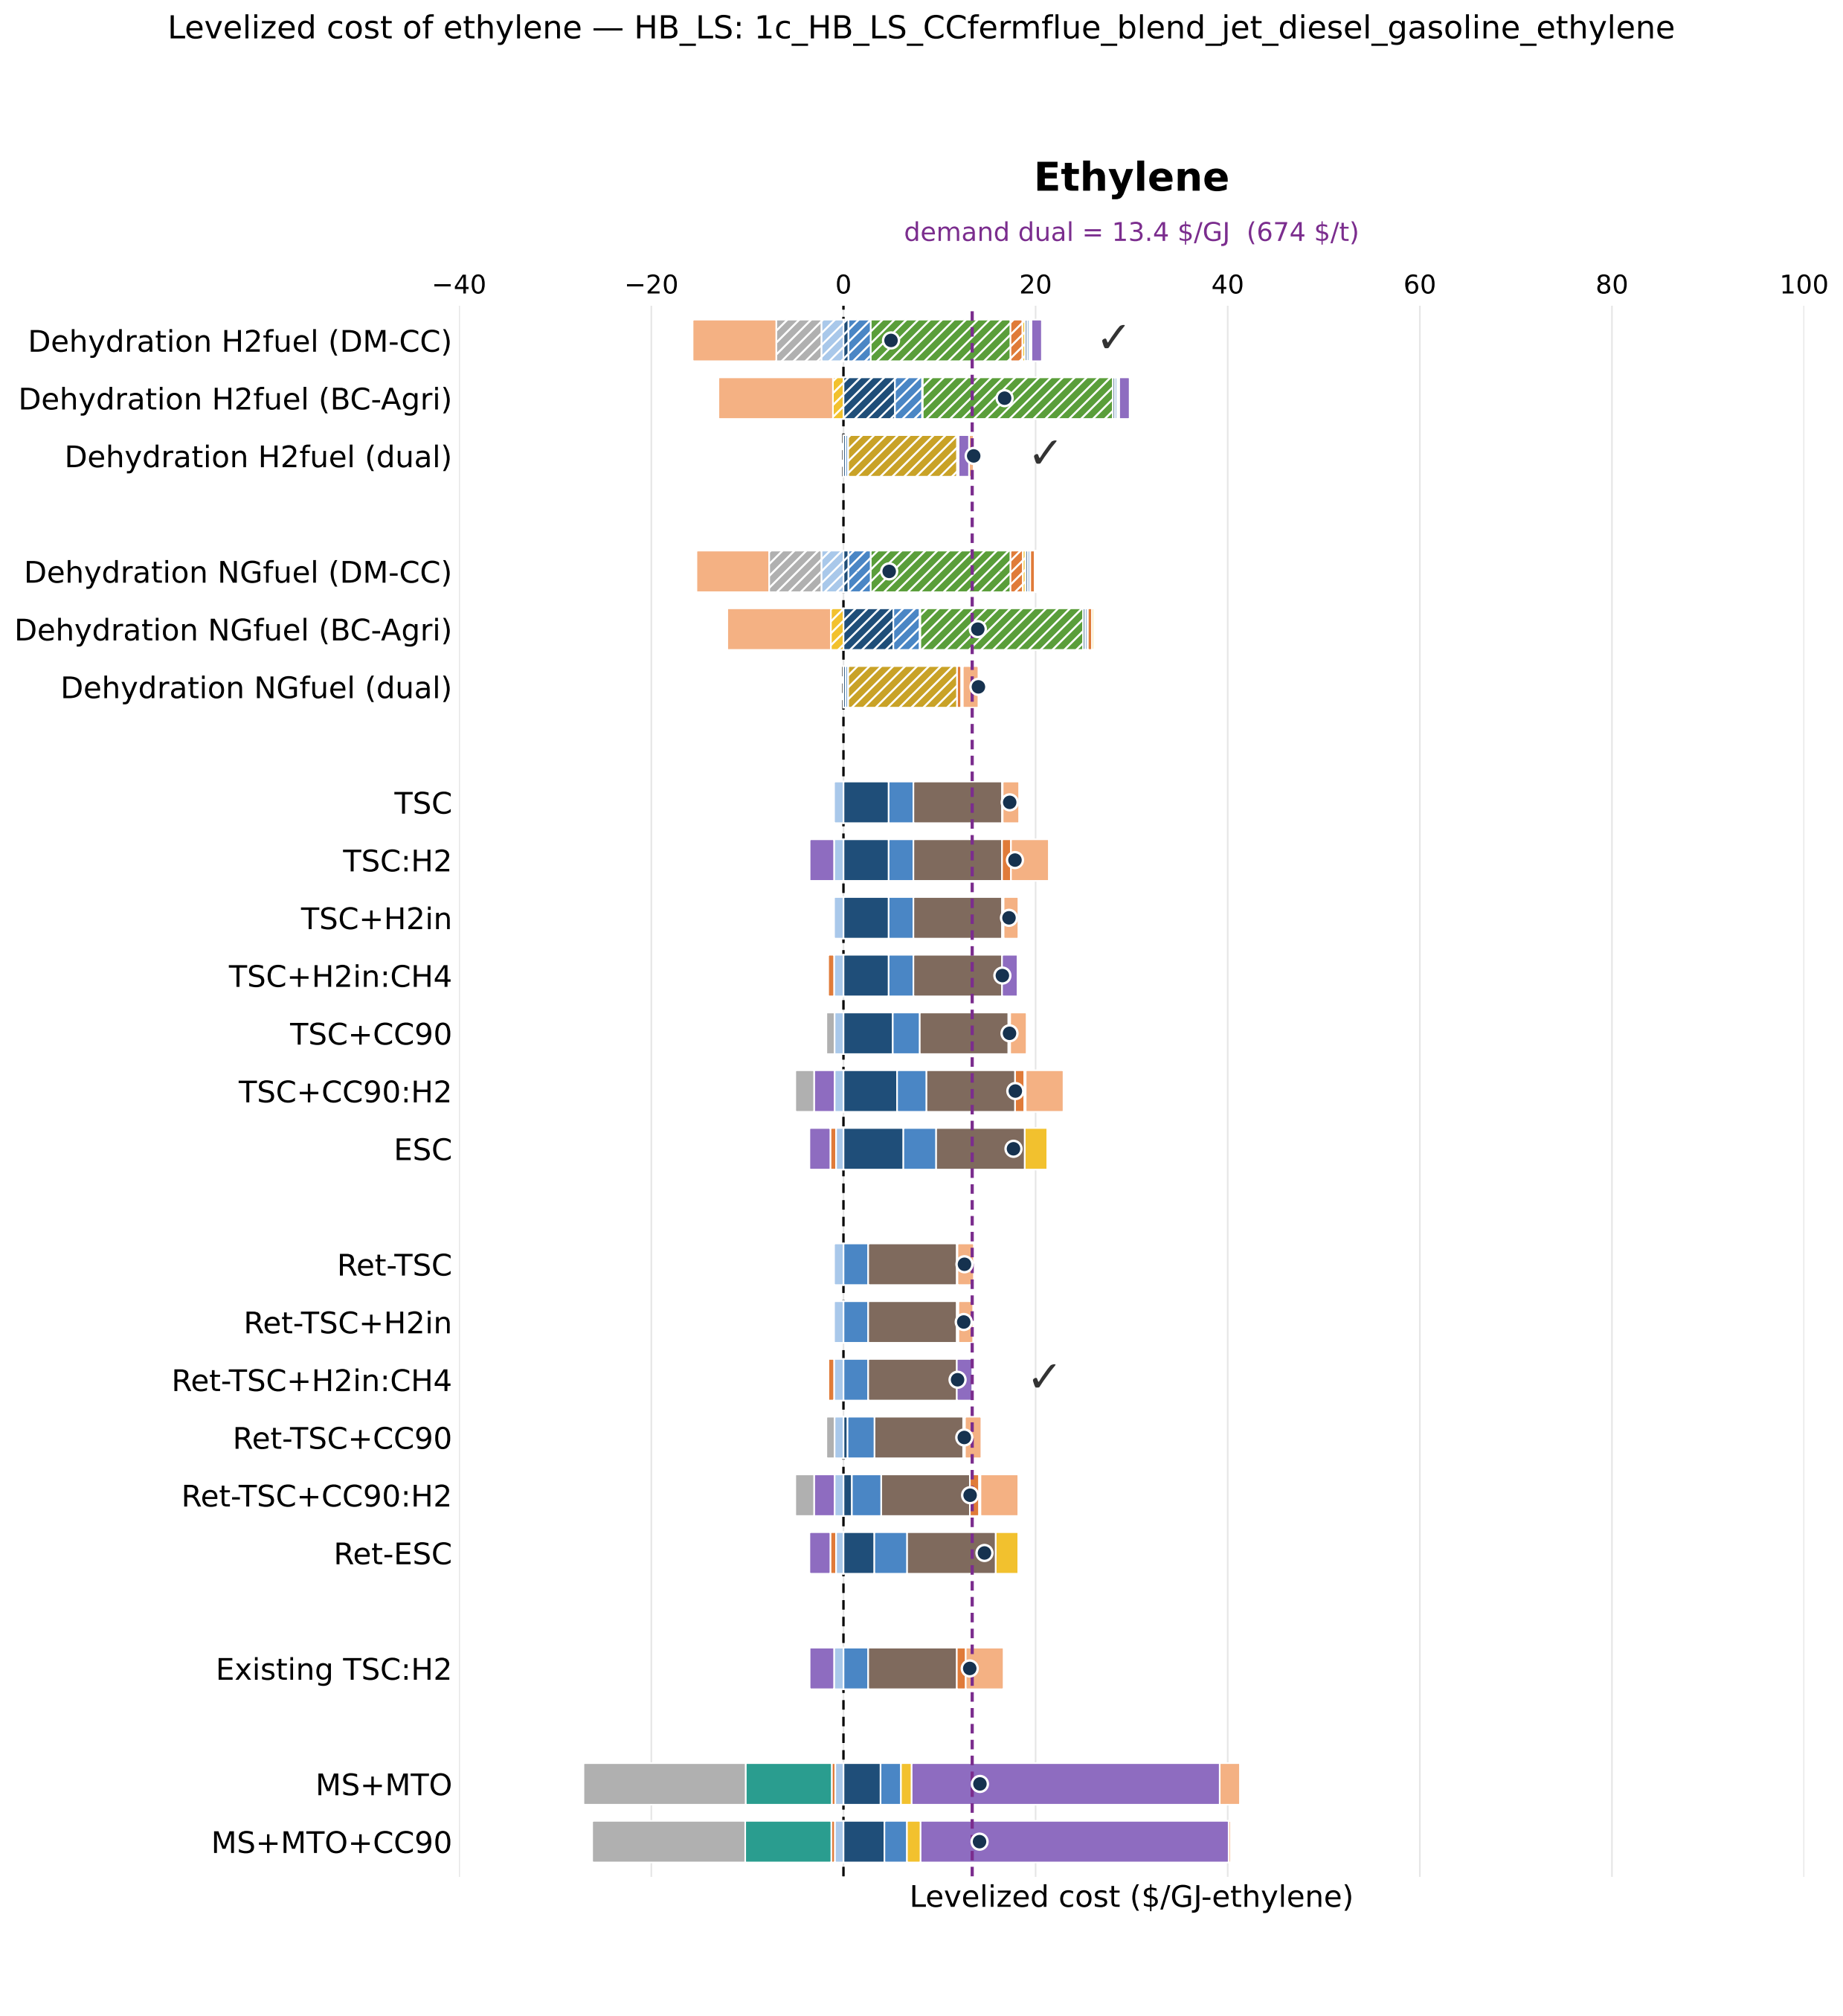
Levelized cost of ethylene — HB_LS: 1c_HB_LS_CCfermflue_blend_jet_diesel_gasoline_ethylene



Ethanol feedstock: (DM-CC) existing dry mill + CC on fermentation & flue gas, reconstructed
(BC-Agri) biochemical Bio_Ethanol_Agri (most-produced), no CC, reconstructed
(dual) ethanol shadow price.
Hatched = ethanol production.
✓ on DM-CC/BC bars needs the route AND that ethanol pathway to be deployed.
